FOR IMMEDIATE RELEASE:

PECO CELEBRATES 20TH YEAR ANNIVERSARY IN BUSINESS

Westlake, OH., Jan. 16, 2009 - PECO is pleased to announce that 2009 celebrates our 20th year in business within the air pollution control industry. To mark our 20th year anniversary, PECO is proud to unveil our updated company website and marketing initiative. PECO was founded on January 29th, 1989 with the mission to become an industry leader in products and services for electrostatic precipitators.

In 20 years, PECO has grown into an established single-source supplier within the marketplace through maintaining a high level of quality, customer service, professionalism and integrity. As we look toward the future, our experienced group of air pollution control experts will progress our growth as we continue to assist in all areas of the industry including; engineering and specification development, equipment fabrication and supply, precipitator inspections, technical consulting services, and project management with turnkey capabilities.

ABOUT PECO-FGC

PECO specializes in ESP Rebuilds and Retrofits in addition to providing a full range of Products and Services for Electrostatic Precipitators. We have experience with all types of OEM equipment and are familiar with the inherent design flaws common among each type of manufacturer. PECO's strength is derived from our engineering base which allows us to provide custom retrofit solutions within an ESP's existing footprint to improve efficiency, performance, and/or longevity of the unit. PECO's products and services include; Precipitator Inspection Services, ESP Performance Modeling, Performance and Efficiency Upgrades (including High-Voltage Sectionalization and the addition of High Frequency T/R Sets), PECO Electromagnetic Impulse Rappers, Rapper Shafts, Purge Air Systems, Hopper Replacements, Hopper Heaters, Level Detectors, and/or the additions of Penthouses or Weather Enclosures.

PECO's sister company, FGC, Inc. specializes in Products and Services for Flue Gas Conditioning Systems which include sulfur trioxide (SO₃) and ammonia (NH₃) based conditioning. FGC, Inc. designs and installs new Molten Sulfur based SO₃ Systems, Dry Sulfur Systems (DSI), NH₃ Systems, Metering Pump Replacements, Control Replacements, DCS Interfaces, Converter Upgrades, Injection Probe Replacements, and Probe Upgrades for SCR installations. FGC, Inc. also performs complete system audits with fatal flaw analysis reports in addition to upgrade products for all existing OEM's of Flue Gas Conditioning Systems. For more information on PECO-FGC and our products and services, please visit our website at www.peco-fgc.com or contact our offices at 440.899.3888.
